

U.S. Army Selects Windward Technology for Task Management Software

Windward .NET Engine to be Integrated into Healthcare Tasker System

FOR IMMEDIATE RELEASE

Boulder, CO – [Windward](#), the champion of reporting, document generation and business intelligence, has been chosen by the United States Army to provide the power behind the Army Health tasker system, software that manages tasks in and around hospital settings. The Windward .NET Engine will be integrated into the Army's A2TS task management tool, which automates the processes of tracking and managing vital health care tasks.

A2TS is part of Army Knowledge Online, one of the world's largest intranets. A2TS enables Army soldiers or other personnel to initiate, route, suspend, monitor and otherwise manage tasks through the secure Army Knowledge Online or Defense Knowledge Online network. The system helps the Army meet its objective of transitioning from paper-based systems to secure, cost-effective Internet applications.

"The U.S. Army relies on task management software to manage enormous amounts of data," said Shirley Clawson, CEO of Windward. "Our powerful solutions are designed to deliver that data safely, securely and at the highest speed possible."

Windward has a long history of providing data and task management solutions to government agencies. Current government customers include Australia's Department of Defense, the Spanish city of Barcelona, the U.S. Department of Energy -Sandia National Labs, the United States Department of Agriculture, and the United States Department of Justice. Windward's reporting software helps organizations worldwide meet requirements of legislative acts such as the Patriot Act, HIPAA, and Sarbanes-Oxley.

About Windward

[Windward](#) offers business intelligence, enterprise reporting, document generation and Web-based business intelligence solutions. Launched in 2002, Windward is the only full-featured, robust Java and .NET engine to use Microsoft Word, Excel and PowerPoint as a layout tool, putting template design and report and document generation power in the hands of the end user. Any Office user can easily and

securely create reports and documents with almost no learning curve. Additionally, OEMs and VARs use Windward's reporting component.

Windward works by merging any XML, SQL or custom data source—or any combination thereof—with a Microsoft Office report template. It feeds data into the template to create a what-you-see-is-what-you-get report or document that can be generated in DOCX, XLSX, PPTX, PDF, HTML, direct to printer, RTF, XLS, WordML, TXT, and CSV. Windward runs as a standalone application or in an enterprise computing environment. Also unique, Windward implements in hours, offers affordable server-based pricing, and offers “prompt, fantastic” technical support via a 24/7 support forum and support contracts. A free trial of Windward's products is available at www.windward.net.

The Windward user group spans 70 countries. User applications include financial statements, inventory reports, product-usage reports, purchase orders, invoices, training certificates, timesheets, and licenses. Other applications include reporting to meet requirements of Sarbanes-Oxley, Patriot Act, ARRA, HIPAA, Health Level Seven, IFRS, Gramm-Leach-Bliley, Basel II, and other U.S. and international acts and accords affecting financial services, real estate, government, and insurance industries and the consultants and integrators serving them.
