

CodeObjects

Switching to Windward helped us **reduce the time it takes to create document templates by about 80%**. Overall it provided a great advantage to us in this competitive landscape.

—Anil Annadata, CEO, CodeObjects

The Challenge

[CodeObjects](#) is a cloud-based insurance process management solution that provides complete automation from quote to renewal. Their previous document generation tool, Adobe LiveCycle®, necessitated complex and lengthy processes:

- Template creation wasted valuable employee hours, requiring up to 3 weeks to create a single template.
- CodeObjects had to convert all of the original documents from Microsoft® Word to Adobe—a time-consuming operation.
- Programmers were spending inordinate amounts of time writing complex scripts for calculators to handle linking and dynamic fields.

The Solution

CodeObjects switched to Windward Studios because:

- Windward provides CodeObjects with ability to easily and quickly create complex business rules within a document.
- CodeObjects customers have the ability to modify templates themselves in a familiar and easy-to-use interface, saving them time and money.
- “Integration with Microsoft Word...is the most critical aspect, and Windward does it great,” said CEO Anil Annadata.

The End Result

After switching to Windward, CodeObjects achieved:

- **Faster document template creation** by about 80%. The process dropped from 3 weeks to roughly just 2-3 days.
- **Quicker customer deployment** by roughly a factor of 3.
- **Shorter customer learning curve.** Customers are able to learn the Windward tool by about 70% faster, on average, compared to the Adobe product.
